

Dr.DMAΣ

SOLUTION ESSENCE

Red

- ✓ A special combination of high quality ingredients to restore the lost vitality
- ✓ All in one premium solution for boosting up a healthy inner skin
- ✓ Contribute moist & shiny skin effect at any age for every skin

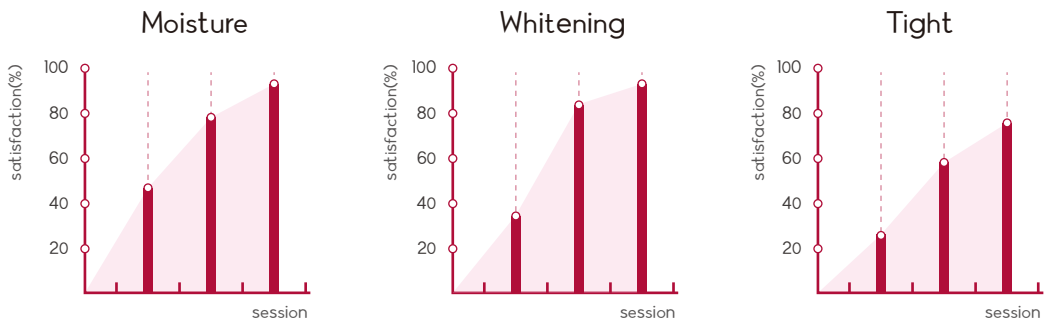

Dr. DMAE Solution Essence Red consists of

PDRN, Hyaluronic acid, Glutathione and 44 complex ingredients.

It revives the function of fibroblasts to promote skin regeneration and prevent aging.

Product Unique Features

1. Complete glowing skin through 3 major skin improvements

2. Special mechanism for healthy inner skin

• Collagen production increase •

By activating fibroblasts, shine increases the production of dermal matrix materials such as collagen and elastin and promotes cell regeneration.

• Skin nourishment supply •

It supplies vitamins, minerals and amino acids that are skin nutrients to make the inner skin healthy.

• Antioxidative effect •

Shine's Antioxidants like glutathione reduce oxidative stress, while vitamins optimize antioxidant networks by regenerating antioxidants.

Get back the lost radiance through a polyrevitalizing complex

The product offers an optimal harmony of 4 typical effectiveness
Regeneration–Nourishment–Moisturization–Whitening which helps your skin
brightly shine up everytime, everywhere

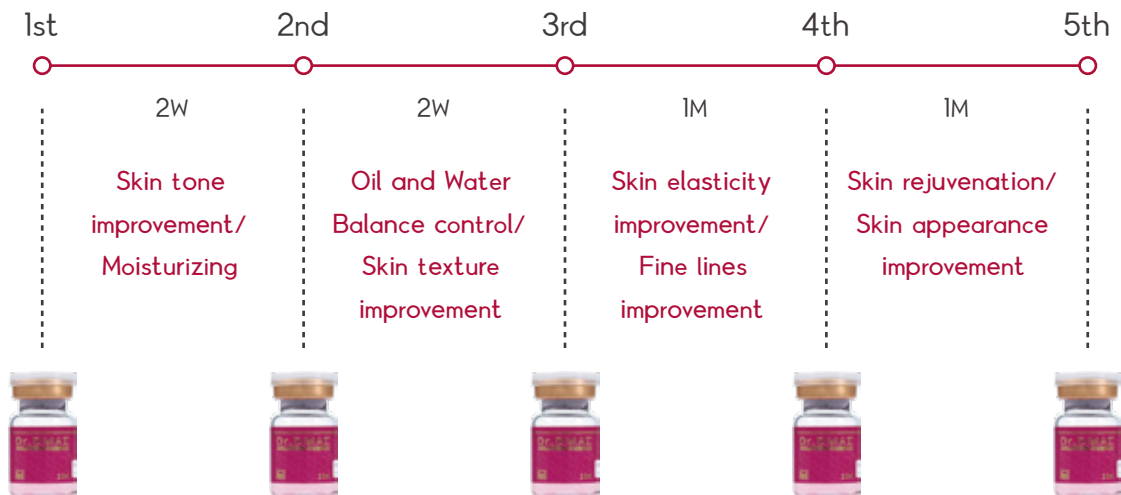

* The pink color may fade away due to the exposure to direct sunlight
It is recommended to store the product in a cool place and out of direct sunlight

Vitamin B12 (cyanocobalamin) inside the ampoule is an active ingredient
that provides energy to the skin promotes a healthy skin look.

※ The pink color of the ampoule is a unique color of pure vitamin B12
without any mixture from other ingredients

*Content of the above material
